

# GYPTONE® ACTIV'AIR® REG POINT 11

## Product Description

Sound-absorbing access panel made of laminated plasterboard, perforated using a punching process and manufactured using Activ'Air® technology. White finish.

## Tecnología Activ'Air®

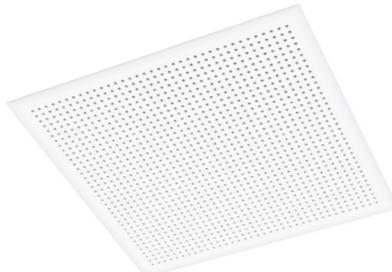

Placo® Activ'Air® products incorporate a compound capable of chemically reacting with formaldehyde, neutralising it without releasing it back into the air. They capture and transform up to 70% of these aldehydes into inert compounds, and under normal conditions are effective for at least 50 years.

## Storage and conservation

Store the panels on flat surfaces and never outdoors, keeping them covered and protected from sunlight and rain.

## Conditions of installation

Recommended installation with Quick-Lock® profiles. For D-edge, installation with T-24 profile is recommended. Gyptone® panels should be installed and used in rooms with relative humidity below 70% and/or temperatures below 45°C.

## Handling

Special care must be taken when transporting and handling the plates, avoiding knocks that could cause them to break, especially around the edges.

## Surface maintenance description

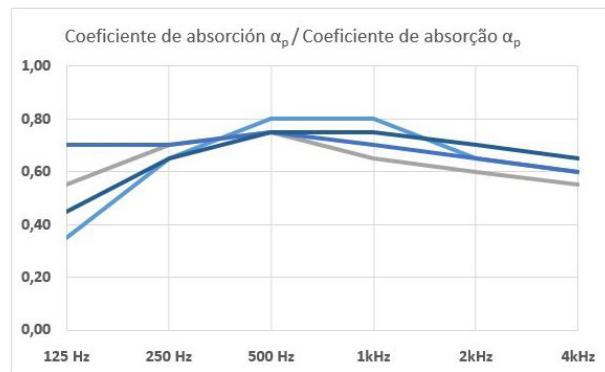

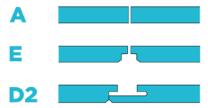

The boards can be cleaned with a vacuum cleaner to remove the dust. The final surface can be painted on the back using a short-haired roller. Using water vapour permeable paint is recommended. The boards must not be spray painted.

# GYPTONE® ACTIV'AIR® REG POINT 11

Characteristic	Value
Norms	EN 14190, Gypsum plasterboard products from reprocessing. Definitions, requirements and test methods
Long Edge Type	A / E-15 / D2
Fire Reaction (EN Standard)	A2-s1, d0
Perforation type name	Circulars
Perforation size	6.5 mm
Perforation ratio	12 %
Back tissue color	White
Color description	White NCS 0500
Total VOC emissions value	A+ (France. Arrêté DEVL1104875A)
