

# PLACO® PPV 13 1200

## Boards

### Product Description

Laminated Gypsum Plasterboard with cardboard on both sides, of 12.5 mm thickness and 1,200 mm in width with an aluminium sheet on the unseen side, which provides a vapour barrier.

### Application

Construction of interior drywall systems: wall partition walls/partitions and self-supporting cladding. It will be used mainly in vapour barrier building systems, to prevent interstitial condensation.

### Storage and conservation

Store the boards on flat surfaces and never outdoors, keeping them covered, away from sunlight and rain. Maximum stacking of the boards: 6 pallets.

### Conditions of installation

Consult Placo® Installation Manual.

### Handling

During the unloading, the aperture of the forks of the forklift should be a minimum of 1/3 of the length of the board being handled, always placing the load in the centre of the forks on the forklift. Special care is advised for handling 3,000 mm boards.
