## Plasters

### Product Description

1 hour powder setting paste with reduced water absorption capacity intended for joint treatment in H1 Gypsum Plasterboard Systems.

### Application

Construction of interior dry systems. Due to its low water absorption, to be used mainly in construction systems in humid rooms. It improves the adhesion of the joint tape in areas of high humidity and is suitable for both filling and finishing the joint, especially in humid areas such as kitchens and bathrooms. It allows the joint to be completed within the day and is suitable for finishing levels Q1, Q2, Q3 and Q4.

### Storage and conservation

Store on flat surfaces and never outdoors, keeping the material under cover, away from sunlight and humidity. The maximum shelf life is 9 months from the date of manufacture printed on the bag.

### Handling

Wearing gloves and mask is recommended.
